The diagram illustrates a central node labeled "PH" in a red circle. This central node is connected to two peripheral nodes, "Pauli Ar..." and "Pauli Ho...", which are also in circles. These three nodes are arranged in a triangle and are enclosed within a larger dashed circle. A red line connects the central "PH" node to each of the peripheral nodes. A red dot is located on the dashed circle, positioned between the two peripheral nodes. A red rectangular box with the text "2 Firmen" is placed near the central "PH" node.
